Equations in Asciidoctor PDF

Euler's identity, $e^{i\pi} + 1 = 0$, and the golden ratio $\varphi = \frac{1+\sqrt{5}}{2}$ sit naturally in running text.

The Gaussian integral and Maxwell's equations render as sharp vector graphics:

$$\int_{-\infty}^{\infty} e^{-x^2}\,dx = \sqrt{\pi}$$

$$\begin{aligned}
\nabla \cdot \mathbf{E} &= \frac{\rho}{\varepsilon_0} \\
\nabla \cdot \mathbf{B} &= 0 \\
\nabla \times \mathbf{E} &= -\frac{\partial \mathbf{B}}{\partial t} \\
\nabla \times \mathbf{B} &= \mu_0\mathbf{J} + \mu_0\varepsilon_0\frac{\partial \mathbf{E}}{\partial t}
\end{aligned}$$

AsciiMath works too, as in the Basel problem:

$$\sum_{n=1}^{\infty} \frac{1}{n^2} = \frac{\pi^2}{6}$$
